Net Wholesale Revenue Proposal Policy Questions

1. Do you support moving toward a more conservative net wholesale revenue estimate to reduce the likelihood of rate surcharges, recognizing this can mean slightly higher base rates initially?
2. Do you support making this transition over a number of years (gradualism) to mitigate the impact on base rates?
3. Do you support reducing the size of the Rate Stabilization Account to mitigate the rate impacts of this transition?
4. Do you support specifying that customers will receive credits against base rates resulting from overcollections in the RSA account (currently overcollections are to be addressed by the City Council)?
5. Do you support modest deferrals of bond principal repayment during the 2013-2018 timeframe to mitigate rate impacts from the Net Wholesale Revenue Proposal and other elements of the Strategic Plan preferred path?
